

Grasping for Emptiness

© 2023 QuiQue

Opposite World

Deliver us from our guilt
Give us our daily temptations
And lead us around the garden

Deliver us from compassion
Forgive us for having periods
As we also forgive you your egotism

What I heard and what I saw
Wasn't what really happened
The opposite world
The opposite world
What I heard and what I saw
Was not what happened
The opposite world
The opposite world

Deliver us from our guilt
Give us our daily temptations
And lead us around the garden
And deliver us from compassion

The opposite world
Forgive us
For having
Periods

Holy fire cannot be extinguished
The opposite world

Oh the opposite world oh

Deliver us from our guilt
Give us our daily temptations
And lead us around the garden

Deliver us from compassion
Forgive us for having periods,
As we also forgive you your egotism
The opposite world

What I heard and what I saw
Wasn't what really happened
The opposite world

What I heard and what I saw
Was not what really happened
Was not what really happened

The Winter Weapon

Break the bread
With the winter weapon
Bake the beans
Feed the hungry heart and head

Crush the crown
It's needed to kill the cold now
Find the fish
That so far did not drown

Break the bread
Crush the crown
And save my soul

Break the bread
With the winter weapon
Bake the beans
Feed the hungry heart and head

Crush the crown
It's needed to kill the cold now
Find the fish
That so far did not drown

Shout the shadow
From a silver sun star
Nothing new
And dance the divine deathblow!

Shout the shadow
From a silver sun star
Nothing new

Find the fish
That so far did not drown

Shout the shadow
From a silver sun star
Nothing new
And dance the divine deathblow!

Nothing new
And dance the divine deathblow
And dance
And dance
And dance

Break the bread
With the winter weapon
Bake the beans
Feed the hungry heart and head

Crush the crown
It's needed to kill the cold now
And dance the divine deathblow!

Names of dreamt future

No such thing as old news
Girls called Peace and Resurrection
Embellish the world spread humble smiles

Messages of hope and action
Nothing else to leave to the world
But blood of the future generation

Nothing to declare or deny
But names of a dreamt future
Names of a dreamt future
Names of a dreamt future

Animals constantly fool themselves
A shining entrance turned out to be
The emergency exit

For Peace and Resurrection
Give us food for thought
Long live the defeated!

A shining entrance turned out to be
The emergency exit
Emergency exit

For Peace and Resurrection
Give us food for thought
Long live the defeated!

Nothing to declare or deny
But names of a dreamt future

All lessons were misunderstood
This book is closed forever
The letters returned unread

Ramble around in a strange universe
Where Peace and Resurrection
Hide, never to be found

Warnings did not do the job
Poorly digested memories
Become the future in our dreams
Poorly digested memories
Become the future in our dreams

Nothing else to leave to the world
But blood of the future generation
The future generation

Peace and Resurrection
Embellish the world spread humble smiles

Peace and Resurrection
Hide, never to be found
Never to be found

The Just Sea

Nitrous waters regain the law
The storm resumes, is getting old
He listens to the sails and stays silent

Watches women more than ever
Caused by fear of being hurt
The smell of smoke didn't cause the pain

What isn't in there can't get out
He doesn't know what he doesn't know
He doesn't know what he doesn't know
He listens to the sails, smokes and stays
silent

He listens to the sails and stays silent
Doesn't know what he doesn't know
Drowning in a just sea Always trying to
tame the wild

Always trying
And keep trying
Trying to tame the wild
They are trying
They are trying to tame the wild

The smell of smoke didn't cause the pain

All his feelings are in the past
He never functions in the now
He never functions in the now
All his feelings in the past
The story never changes
And his story never changes
And his story never changes

What isn't in there can't get out
What isn't in there can't get out
What isn't in there can't get out

Watching women more than ever
Caused by the pain, the fear, the pain of
being
The smell of smoke didn't kill the pain
The smell of smoke didn't cause the pain

What isn't in there can't get out
Doesn't know what he doesn't know
Drowning in a just sea
Drowning in the just sea
Drowning in the just sea

Unfinished Dream

(Based on a poem by Katerina Yegorenkova)

Here it is

Here they were standing, barely breathing
Here they fell on their faces too
Every thoughtless step
Every unfinished dream
Every unfinished dream
Every unfinished dream

All of you who forgave the wrong people
All of you who loved the wrong person
All of you
All of you
All of you
All of you who forgave the wrong people

All of you who loved the wrong person
Forgave the wrong people
Loved the wrong person
All of you

Here they were pressed against the wall
Here they were dropped in the corner too
All the unmelted snow
All the seeming friends
Here it is
All the unmelted snow
All the seeming friends

Here it is, explosive mixture
Here it is, restless stirring
Every unsolved gesture
Every unfinished poem

Here you are, sitting in the dark
Here you are, gasping for emptiness

Nature's Law

We changed all nature's laws

Heaven is an upstairs room
When reborn from a magic womb
Faster than life, without any pause
We changed all nature's laws

A parrot blinded by illusion
Broke the window and killed itself
Someday I will be like a flower
Conquering rain-watered earth
But so far I'm only a raindrop
Falling, falling, falling down

It appears there's a battle going on
Between the clouds and the sun
The outcome is written in the stars
We all know this encounter does not really
exist
Yet a hint of bias passes the mind's eye
While making music for the unborn and the
dead

The Last Night

It smelled like winter and dead flowers
And last night the world changed
Last night the world changed
I dreamed of a house
Full of strange people
You didn't know them either

I asked what they were doing here
It made you angry
Until the alarm went off
And we had to hide
And we had to hide
We had to hide

We're dancing in the fog
Can't even see our empty hands
We're dancing in the fog
Can't even see our empty hands
Talking to the dog
And talking to the dog
That never answers, never talks back

Didn't know where or when I was
Yet it must have been for years
It smelled like winter and dead flowers
And last night the world changed
It was last night that the world changed

Dancing in the fog
Talking to the dog

Last night the world changed
We played in the dark
Found empty houses
And the women were willing too

Last night the world changed
I dreamed of a house
Full of strange people
You didn't know them either

I asked what they were doing here
It made you angry
Until the alarm went off
And we had to hide

We're dancing in the fog
Can't even see our empty hands
Talking to the dog

And talking to the dog
That never answers, never talks back

Last night the world changed
We played in the dark
Found empty houses
And the women were willing too

Last night
The last night

LHBTQUIQUE

Fluid identity is strongly wanted
Strongly wanted

I've met Volodimir from the USA
And Vladimir from Italy
No questions asked
Just took it for granted

Birth name Hendrik
Hendrik from Holland
Henry, Henri
Heinrich, Enrico

Or say Enrique
My brothers and friends
Or say Enrique
My brothers and friends

They call me QuiQue
Call me QuiQue
It's not in the name
What counts is what you hear

Too Much Yes

Where man is too much
Distance remains
Let memory fade
It's all guilty touch

We'll go together, when we go
Too much yes equals a no

Life was young, was love, was hope
Coward men point toothless guns
At the beauty of the frightened nuns
They're chewing all day

On their cheap dope
Life was young, was love, was hope
Coward men and the beauty

We'll go together, when we go
Too much yes equals a no

Life was young, was love, was hope
Coward men point toothless guns
At the beauty of the frightened nuns
Where man is too much
Life was young, was love, was hope
Coward men and the beauty

Absent Friends

It was party time again
Seagulls feed with yesterday's vomit
I meet true people when time is right
And digest forbidden fruit

I strongly plead for dedication
And have to accept decay and the filth
I strongly plead for dedication
And have to accept decay and the filth

We kissed the first the best
And stayed until the end
Danced like magic, virgin lovers
Now we wait for memories to fade
We wait for memories to fade

Danced like magic, virgin lovers
Now we wait for memories to fade

Miracle that goes unnoticed
Does not need believers, true
With absent friends already engaged
There's nothing we could do
But digest the forbidden fruit

We kissed the first the best
And stayed until the end
Danced like magic, virgin lovers
Now we wait for memories to fade

Danced like magic, virgin lovers
Now we wait for memories to fade

Miracle that goes unnoticed
Does not need believers, true

With absent friends already engaged
There's nothing we could do

The Top

I like to fool myself, the madman said
It's not the booze I am addicted to
I simply enjoy the state of calm hangovers

When I don't know how to live life
When I don't know what to do
I am only look
I am only looking for you

Learn to fly, start future telling
Open doors in dark rooms
Don't wait for change
Sticks beat on my hollow ears
Keep trying the impossible

I don't care how people perceive me
Don't wanna be afraid of the past
Trying to find the place where I want to be
Travelling to what I don't know
I only want
I only want to be with you

No front or back, no ups or downs
Indeed you have always known
Invented past, dreamt memories
Closed the tomb before I could enter
Keep trying the impossible

When I don't know how to live life
When I don't know what to do
I am only look
I am only looking for you

Everything is always new
I am constantly looking for another you
Constantly looking for
Another you
