Punky Junky's Journey

"Nepoviem lebo sama neviem
A ja ti nepoviem lebo sama neviem"

He ran from inconsistencies
Pushed by taboo on cowardice
Well then he reached the foreign land
Where once he used to feel at home

Heard girls singing in the mountains
And saw men so proud of their soil
The fat lady from a past life
Seemed to be waiting for nothingness

"Be better, sound and safe
I won't stay long
This time not forever"

He followed the wild mountain stream
And then climbed the peaks of thin air
If you can't change, accept what is
The next stop will be dance

Downhill the warm embrace waits
Be silent if you're not faithful to me
She knows so well what she doesn't want
Not afraid to admit what we don't want to be

We only want win-win
No time to lose
Be everywhere at home

Even when you are lost in your head
Let tears flow, then get far from them
Life smiles at those who follow their heart
The mercenaries of love
Love mercenaries

The mercenaries of love
Love mercenaries

Private Pink

Passion took over after the dance
Circling around, don't know where to look
Tell me you're married
Please, no one night stands!

Stars now are shaken, won't let it show
Crazy not stupid, winding around
This love is biggest,
There's no need to grow

Trying to fly again, don't touch the ground
Dancing for ever, blowing our minds
Fear's no adviser
There's life to be found

Unpromised faithfull, very well-known
Difficult persons want it all now
The whole in the circle
Is not to be shown

Clean Street

"There's no need to stay longer", is what
She said in the morning
Though the room was long since paid
We drove across the river

"You could as well stay with me"
Thus she showed me her magic world
And then took me to her bed
Start adventures in the now

Together in my car
Together drifting far
More happy than could be
I closed my eyes to see

"Excuse me, I hate housework"
Opened a door in Clean Street
Gave me code and key at once
Trust for granted, without words

"I really love my body!" she said
"That took me quite some time",
Two not so easy beings
Mirrors who recognize themselves

Strangers close to our hearts
True love right from the start
"It makes me really fear"
So happy to be near

The shadows of the shadows
Dark fighting with our lovers' past
Who am I yet to deny
It's magic when we fly!

WitchTrustMagic

She trusted me in everything
But didn't want a child
And when we stopped the thoughts about
Our bodies were so kind

Romantic ways of life that is
Final fools forever
When nothing else makes sense to us
(We) leave stupid people far

If we came to know each other
In yet another life
So evident we are, my love
Want you to be my wife

Witch and wizard found each other
For doing what they can
Magic in the air, no bother
And I want to be your man

Home in Heaven

We don't need much
We don't eat meat
We need shelter for the night!

When there's a groove
We want to move
And our bodies scream out loud!

When we're apart
We cannot sleep
And we're talking all night long!

When we are one
We do not sleep
Our embrace is much too strong!

We don't need words
We don't need rules
We are only here for love!

We're home in heaven
We're home in heaven
We're home in heaven
We're home in heaven

Science Song

I believe in I, I, I
You believe in you

I believe in you, you, you
And you believe in me

We believe in love, love, love
When we make it

Equal Pigs

Food comes first
Fear needs gone
Food for love
No time to waste

Feed the pigs
Kill the monkeys
Don't even try
To be human

Found free drugs
Addictive bodies
Stretch the max
And free your ass

Free butterflies
She's like a bird
Comes like a cat
I feel like a banana

Move them rocks
For dance away
Blood makes newborns grow

Our animals can't survive no farm
Pigs propagate our basic needs
Monkeys make a traumatized mess
Butterflies cause us crazy be in love

Live Forever

I've cut me with a knife
She gave me instant glue
There was blood in the kitchen
But yet, we were hungry too

I knew her from a past life
When she looked at me with a smile
There was nothing to forget
I understood, instantly, for a while

I've kissed too many brides
Though she gave me another chance
Drank the drinks of sad and lonely
But I never stopped the dance
I never stopped the dance

Youth is dying
Death is born again
God is ill
And I will live forever

Lalalalalalalala!
Lalala, tralala!

Lost without you

If you stay here, I will stay

Trying to kill the family
We'd rather not be alone
Because we share space and time

Don't want to be dependent
We want to burn our own fire!
Where it takes two to do it
Not to be alone and lonely

Brothers and sisters we are forever
Freedom is our holy word

When we find peace we will lose our
selves
Not out of fear, but we choose
Not to be alone and lonely

If you stay here, I will stay
If you leave, I will go with you
Or I will feel lost without you
If you leave, I will go with you
Or I will feel lost without you
Lost without you
Lost without you

Monkey Bird (She does not kill spiders)

She knows about magic
And does not kill spiders
When life is strange and tragic
We all are easy riders
And dance the answer too
I'm so in love with you

Hey lover, you've got to understand
Hey lover, take me by the hand

We need to be fighters
Make peace with our fears
So heavy stuff feels lighter
No time for hiding tears
I'll let you use me too
'Cause I'm in love with you

Hey lover, you've got to understand
Hey lover, take me by the hand

She knows well what she doesn't want
And does not kill spiders
Gives names to all her plants
Connects with outsiders
No, there is no taboo
I'm so in love with you

Hey lover, take me by the hand
Hey lover, you've got to understand
How I'm in love with you
